Note: J-term is possible sophomore year, as long as the student balances the year to not go over credit.

Note: J-term is possible senior year, as long as the student balances the year to not go over credit.

^{*} Students may begin with a two-semester sequence of general chemistry rather than the honors general chemistry course. They may also begin with Math 130 or 140 (pre-calculus) but a year of calculus is required for the major. There are numerous options for chemistry electives and at least 8 Cr of chemistry electives are required, spanning 3 out of 4 fields of interest. The gen. ed requirements maybe taken in a different sequence, but they are presented to show the room for them in the program plan. Within this plan students must also take at least one course each satisfying the following all-college "perspectives": Intercultural, historical and ethical (quantitative will be fulfilled by major requirements).

^{**} Chemistry 490L may be waived at the discretion of the department in lieu of research during a summer of the academic year.
